

Beat the Calculator

- Materials**
- number cards 0–9
(4 of each)
 - 1 calculator

Players 3

Skill Mental addition

Object of the game To add numbers faster than a player using a calculator.

Directions

1. One player is the “Caller.” A second player is the “Calculator.” The third player is the “Brain.”
2. Shuffle the cards. Place the deck number-side down on the table.
3. The Caller draws 2 cards from the number deck and asks for the sum of the numbers.
4. The Calculator solves the problem *with* a calculator. The Brain solves it *without* a calculator. The Caller decides who got the answer first.
