City/School Liaison Committee
Special Meeting
Agenda

Thursday, June 23, 2016
8:00 AM to 9:30 AM
Palo Alto City Hall
Community Meeting Room
250 Hamilton Avenue, Ground Floor

City of Palo Alto
Tom DuBois, Council Member, Committee Chair
Cory Wolbach, Council Member

Palo Alto Unified School District (PAUSD)
Terry Godfrey, Vice President
Melissa Baten Caswell, Board Member

Staff
Khashayar “Cash” Alaee, City Manager’s Office
Cathy Mak, District Chief Business Officer

Call to Order

Oral Communications 8:00-8:05AM

Agenda Items

1. Approval of Minutes- May 26, 2016 8:05-8:10AM

2. Review of Recent City Council/PAUSD Board Meetings
   City of Palo Alto: http://www.cityofpaloalto.org/gov/depts/cou/council_agendas.asp
   PAUSD: http://www.pausd.org/meetings 8:10-8:30AM

3. Discussion Regarding Impacts of new Kindergarten Schedule 8:30-8:50AM

4. Discussion Regarding Early Education and Childcare Capacity and Needs 8:50-9:20AM

5. Review Upcoming Calendar and Agendas 9:20-9:30AM

Adjournment

AMERICANS WITH DISABILITY ACT (ADA):
Persons with disabilities who require auxiliary aids or services in using City facilities, services or programs or who would like information on the City’s compliance with the Americans with Disabilities Act (ADA) of 1990, may contact (650) 329-2550 (Voice) 24 hours in advance.
The Special City School Liaison Committee meeting in the Community Meeting Room at this date at 8:02 A.M, 250 Hamilton Avenue, Palo Alto, California.

Present:  
City of Palo Alto  
Tom DuBois, Council Member, Committee Chair  
Khashayar “Cash” Alaee, City Manager’s Office  

Palo Alto Unified School District  
Terry Godfrey, Vice President  
Melissa Baten Caswell, Board Member  
Cathy Mak, District Chief Business Officer  

Absent: Cory Wolbach, Council Member  

Oral Communications  
None.

Agenda Items  
1. Approval of Minutes - April 26, 2016.

Tom DuBois, Council Member and Committee Chair: I guess the first thing is approval of Minutes.

Melissa Baten Caswell, School District Board Member: I make a Motion we approve the Minutes.

Chair DuBois: Do we have a second? I'll second.

MOTION: Board Member Melissa Baten Caswell moved, seconded by Chair DuBois that the City School Liaison Committee approve the Minutes from April 26, 2016.

Council Member DuBois: All in favor.

MOTION PASSED: 3-0 Wolbach absent
2. Review of Recent City Council/PAUSD Board Meetings.

Tom DuBois, Council Member and Committee Chair: The next item is review of recent Council and School Board meetings. Do you want me to go first?

Terry Godfrey, School District Vice President: Did we have a School Board meeting last week? I can barely remember it.

Melissa Baten Caswell, School District Board Member: We have a couple of things that have been decided lately that were of interest to the community. We are moving—actually this is of interest. We need to probably talk about whether it has any traffic impacts. We moved forward with full-day kindergarten across the District. That will change the end of school time for almost every school. Some schools—we have two schools that already have a basic—one has full-day and one basically does. What else did we approve? We approved our union contracts, so we are giving salary increases across our different groups and across our non-union groups as well. What else did we decide? We're reducing class sizes. We are investing almost $2 million to reduce class sizes. We are investing in a bunch of new programs as well. This is nice that we have some surplus this year to do that. Feel free to jump in if I'm missing something.

Ms. Godfrey: While not necessarily pertinent to City business, you may have heard about the Advanced Placement (AP) test fumble at Gunn High School. A lot of the kids are retaking their AP tests, because there was a mistake in administration. That's being remedied with new AP tests in the next couple of days. We're going this afternoon to do an ice cream social with them with Rick's Ice Cream.

Ms. Baten Caswell: Which the kids asked for. We said, "Is there anything else we can do? Obviously we feel terrible. We're horribly sorry. Is there anything we can do?" Amazingly they thought ice cream would be a winner, which I just don't ...

Ms. Godfrey: We're going to scoop ice cream.

Ms. Baten Caswell: This is when you know you have kids.

Ms. Godfrey: Yeah, that's it exactly.

Chair DuBois: There are new proctors or ...

Ms. Baten Caswell: There's a five-point plan that the Superintendant is putting in place, which starts with the fact that not only are we going to be training proctors better, but we're going to be monitoring this from the
District Office. Where these tests were basically handled on site, now they're going to be trained, and there's going to be a process. That's all going to be run from the District Office.

Ms. Godfrey: The proctors will take a Sabbatical or (inaudible) they won't do the same thing. It won't be the same people every year. That sometimes leads to (crosstalk).

Ms. Baten Caswell: Sometimes that creates issues. I think the other thing to know here is that the Superintendent talked to the college board, and they have no intent to go back in time and look at prior years.

Chair DuBois: This wasn't a change in the way tests were deployed. Potentially it was just (inaudible)?

Ms. Baten Caswell: We don't know. Honestly, we don't know. That would be a huge undertaking. Since they're not going to be going back in time, we're going forward with this.

Ms. Godfrey: Part of the issue was the seating (crosstalk).

Ms. Baten Caswell: There are either three or four kids from Palo Alto High School (Paly) who took the tests at Gunn. They will also get an ice cream social with the Gunn kids. No one's happy about what happened but, I think, there are a couple of things (crosstalk) is that the administration (crosstalk) everybody now.

Chair DuBois: There's actually money to both do the salaries and decrease the class sizes?

Ms. Baten Caswell: Yes.

Ms. Godfrey: Yes.

Ms. Baten Caswell: Yes, there is.

Ms. Godfrey: Hard to believe.

Ms. Baten Caswell: The newspaper has not necessarily covered that accurately. The new Performing Arts Center at Paly has opened, and there were three soft launch events. I invited the Council to ...

Chair DuBois: Thanks for the invitation. I couldn't make it (inaudible).

Ms. Baten Caswell: It is so fabulous there. There is not going to be another event before the fall that's a school event, obviously because school's
closing. If there are Council Members that would like a tour, I would like to make sure we can figure out how to arrange that.

Ms. Godfrey: That's fabulous.

Ms. Baten Caswell: It's not just going into a regular theater. There's stuff in it. During the concert they did—actually they did it during the theater production and also during the band concert. They did this thing where they turned off the acoustics; they turned off all the microphones. They played or talked or did whatever they were doing, and then they turned them back on. The difference in acoustics was unbelievable. There are just some things that you might not—if you're not a theater person, somebody would have to point out to you. That's why I think a tour would make sense.

Chair DuBois: I saw the swim teams did very well. I sometimes I wonder if—there's a lot going on in the schools. The City should celebrate some of these things sometimes.

Ms. Baten Caswell: We announced it at the School Board meeting, all the swim team successes. It's always nice when things like that. When we have a Board packet, we have staff and student successes in the front of them.

Chair DuBois: I don't think we do that.

Ms. Baten Caswell: We should figure out a way how to extract that piece out and make sure you guys get that.

Ms. Godfrey: (crosstalk)

Ms. Baten Caswell: There's some great things.

Ms. Godfrey: (crosstalk) Board meeting, this one we had the Math Olympiad winner for the whole U.S., a sophomore at Paly. Sophomore.

Ms. Baten Caswell: And very humble. He came up and...

Ms. Godfrey: Super humble.

Ms. Baten Caswell: You would never...

Ms. Godfrey: In my spare time, I like to work on problems.

Ms. Baten Caswell: I just like to think about them.

Ms. Godfrey: (crosstalk) I just like to think about problems in my spare time.
Chair DuBois: Sometimes the Mayor can give a Proclamation, but we can't do it all the time. It's like the things...

Ms. Baten Caswell: This is why you sort of have to look at the whole thing and decide what you would like to give a Proclamation about. Were you going to talk about the other...

Ms. Godfrey: The other one is—we have a math modeling team at Paly. For two years in a row, two years running, they're going to the world championships for math modeling. Last year they went to Hong Kong; this year they're going to Germany. It's great. I don't know if companies put those questions in, but they're very real-life questions.

Ms. Baten Caswell: You share the questions, because that's...

Ms. Godfrey: The question they had to do was how do you figure out how to insure prize money at athletic events. We're going to give you $100,000 if you get a hole in one or we're going to give you $250,000 if you break a world record. How do you do that?

Ms. Baten Caswell: It was an insurance problem. They actually had to figure out how do you insure that.

Ms. Godfrey: It's an insurance problem. How do you figure out how to insure those things?

Chair DuBois: Then they'll (inaudible) for it?

Ms. Baten Caswell: Yeah. There was another problem. What was the other problem? It was about road rage and how do you set up road systems so that road rage is less likely.

Ms. Godfrey: They sort of get locked together for a couple of days, and they just work on the problem.

Ms. Baten Caswell: They basically have to take a story problem and turn it into the math one.

Ms. Godfrey: A model.

Ms. Baten Caswell: The model that they're going to—they actually created a computer model for the road rage thing and also for the insurance one. What's interesting about this is the four kids last year were juniors. Most schools, when you see these kind of teams, it's Seniors.

Ms. Godfrey: We had a good success, two successes.
Chair DuBois: That'd be great to get that successes thing, but if there is ever something that just seems so (inaudible), bring it to our attention.

Ms. Baten Caswell: Winning the Math Olympiad for the world—for the U.S., that's pretty...

Ms. Godfrey: That's big stuff.

Ms. Baten Caswell: For a sophomore, that's huge. That's bigger than going to CCS. Although, there's a lot more kids going to CCS. Actually the fact that the Paly team went to CCS with no pool is sort of amazing.

Chair DuBois: A lot of time over at Gunn.

Ms. Baten Caswell: What?

Chair DuBois: A lot of time in the Gunn pool this year.

Ms. Baten Caswell: The Gunn people could say that. They're spending a lot of time on buses is what's really happening.

Chair DuBois: Thanks for that update. I was trying to go through some of our recent meetings. We've had a lot of issues that don't necessarily impact the schools. We did pass Residential Preferential Parking (RPP), and we're trying to do both Evergreen and South Park together.

Ms. Godfrey: Southgate.

Chair DuBois: Southgate.

Ms. Godfrey: South Park's a show.

Ms. Baten Caswell: It might feel like South Park, but it's...

Chair DuBois: We're going to (crosstalk) a small town in Colorado. I expect that to happen. It'll take several months.

Ms. Godfrey: That's great.

Ms. Baten Caswell: On that point, I guess we didn't bring this up. Is it 56 or 58 spots opened up at Paly with the opening of the performing arts centers?

Ms. Godfrey: Cathy's like, "Don't ask me that question."

Ms. Baten Caswell: The staff re-jiggered ...
Ms. Godfrey: (crosstalk) spaces opened at Paly.

Ms. Baten Caswell: ...or reallocated permits based on that. There should be a lot of people that were parking at Southgate that have permits now.

Chair DuBois: Good. We've talked about, a year or two ago, if there's a way to look at how Paly issues those student permits, next fall would be the right time with the new permit restrictions coming in. We also approved the concept plans for several bike plans, mostly in south Palo Alto. The entire length of Bryant is getting refreshed, but Ross Road and—I'm trying to remember the name of the road that goes along Greer Park and past Ohlone.

Ms. Baten Caswell: Colorado?

Ms. Godfrey: Amarillo.

Ms. Baten Caswell: Amarillo.

Chair DuBois: Yes, Amarillo. There's actually some really nice reconfigurations right around Ohlone in terms of where the crosswalks are and things.

Ms. Godfrey: That's good. (inaudible)

Chair DuBois: There was a lot of discussion about removing parking. I think they're going to relook at some of those locations, particularly around Greer Park, which can have high peak times with soccer and baseball and stuff.

Ms. Baten Caswell: If the parking situation around Ohlone or any school is going to change (crosstalk) going to be great.

Chair DuBois: I don't think parking changed there. Around the park at certain places, I think, and Ross Road, they were looking to slow down traffic with bulb-outs and things which remove parking spots. They're adding some roundabouts which also remove parking on the corners of streets. That's the kind of parking we're losing. It's not...

Ms. Baten Caswell: It's not near any schools that you know of, that can create a reduction in spaces around a school.

Chair DuBois: I can't think of any.

Ms. Godfrey: Reducing the parking at corners is great, though.

Ms. Baten Caswell: It's much safer for people.
Ms. Godfrey: It really helps visibility.

Chair DuBois: We also had a discussion about the Comprehensive (Comp) Plan you might have read about and the scenarios that we're looking at. We did end up adding two scenarios. One of those scenarios had a lot more housing which would impact the schools. Those are coming back in early June with more definition and final approval.

Ms. Baten Caswell: Where would we go to see those proposals?

Chair DuBois: I just said they're not really even finalized yet. They'll be coming back in June.

Ms. Baten Caswell: We wouldn't see them before June.

Chair DuBois: Right. I think it was targeting 6,000 housing units by either 2020 or 2030. I think it's 2030.

Ms. Baten Caswell: This is like the Housing Element where you've just given permission for those to be... 

Chair DuBois: Yes.

Ms. Baten Caswell: There's not actually plans and developers and all those kind of things.

Chair DuBois: The City doesn't build houses; we just approve the plans.

Ms. Baten Caswell: You could if you wanted, but (inaudible). That'd be outside of your scope.

Chair DuBois: Right. That's just something to be aware of (inaudible) launch.

Ms. Baten Caswell: We talked about the bike thing last week, last time, about the bike stealing program. Not program, but the...

Ms. Godfrey: It probably is a program; it's just not our program.

Ms. Baten Caswell: I just wanted to say that Dennis Burns and I had a long conversation and talked about having a three-element plan to work on this. An element that would include communication out to students and parents about what you do if your bike is stolen and how to protect against that, but also what to do if it happens. Working with the school to help the school—it's not clear whether Gunn really has a problem, but Paly clearly does. Working with the administration so they don't feel completely responsible,
and also he has a personal plan to do some things with Public Safety that he thinks might make a difference. I just was thrilled, first of all, that he got back to us and, second of all, that he was willing to talk about that kind of thing.

Ms. Godfrey: Did you guys do some Safe Routes to School thing at City Council?

Chair DuBois: Yeah. I think it was tied to that same meeting where we talked about the bike routes. Wasn't it?

Khashayar Alaee, Management Analyst: That was a—I forget the year. I want to say 10-year celebration or anniversary.

Ms. Godfrey: That sounds right. Yeah, probably 10 years.

Chair DuBois: Yeah. It was recognition; it wasn't a discussion.

Ms. Baten Caswell: Was it a Resolution to recognize the 10-year? Maybe we should do something as well.

Mr. Alaee: It was (inaudible) and also Kathy Durham retired. There was a Resolution for that.

Ms. Godfrey: Maybe we should.

Ms. Baten Caswell: I actually have a write-up from Kathy that she emailed me. I didn't really understand how it fit in, but now I do.

Chair DuBois: On the bike theft, was there any discussion about cameras or anything?

Ms. Baten Caswell: That's been discussed. The problem is they've seen some of these, and that hasn't helped. That's going to be part of it.

Chair DuBois: If you've (crosstalk) to say everyone's present.

Ms. Baten Caswell: Just for that reason, there needs to be multtier—the administration at Paly was under the impression that it was completely their responsibility, and they don't have enough supervisory people to be everywhere at all times. It was, I think, nice to know that there's going to be some cooperation.

Ms. Godfrey: On a related note, Du Juan Green, the kids picked him as one of the diploma hander-outers for (crosstalk).
Ms. Baten Caswell: Which is a big honor. They only pick a few people to do that.

Ms. Godfrey: It's high touch on campus.

Ms. Baten Caswell: Almost always it's a staff person. It's very unusual for it not to be somebody that works for Palo Alto Unified School District (PAUSD).

Chair DuBois: Very nice. Not a Council meeting thing, but we had the Jane Lathrop Stanford Middle School (JLS) exit interviews, and (crosstalk) good combination of...

Ms. Godfrey: That's a good break.

Ms. Baten Caswell: Those are so fun, aren't they?

Chair DuBois: Yeah. I think quite a few City people, several police officers participated.

Ms. Baten Caswell: Your Fire Department Chief was there. It was very impressive how many people come for that.

Chair DuBois: It's really fun.

Ms. Godfrey: The kids are amazing. They're amazingly impressive. Have you ever done them, Cash? They're just amazing.

Chair DuBois: You interview these eighth graders who are graduating middle school, and they come in prepared to answer a bunch of questions and show you stuff they worked on.

Mr. Alaee: That sounds fun.

Ms. Baten Caswell: They dress up (inaudible) professional thing.

Ms. Godfrey: They dress up. The come in there in an interview suit. You only spend 15 minutes with them, but they practice all the questions. (crosstalk) stuff to show you, and they tell you about their journey over their year. You're like, "You went (crosstalk)."

Ms. Baten Caswell: Sometimes they bring three-dimensional things like race cars they've built and...

Ms. Godfrey: Clocks.
Ms. Baten Caswell: ...clocks. Someone brought a cello to one of my interviews, and then played it.

Chair DuBois: I had a girl play violin. It was good. One last thing. We had a Rail Committee meeting yesterday. Caltrain is planning some small changes to all the grade crossings.

Ms. Baten Caswell: What kind of changes?

Chair DuBois: It's restriping, moving some of the places where cars can park between the tracks on Alma, adding a median so that cars cannot try to drive around gates...

Ms. Baten Caswell: That's a good idea.

Chair DuBois: ...and adding quad gates, four gates instead of two.

Ms. Godfrey: Any discussion about grade separation? Did you see the article yesterday that there was seven deaths in five days?

Chair DuBois: There's a lot of discussion.

Ms. Godfrey: Seven deaths in five days on the tracks.

Ms. Baten Caswell: Where did you see that article?

Ms. Godfrey: I got it in—I'll forward it (crosstalk) what newspaper it was.

Chair DuBois: If there's any way you guys have time and can apply pressure. The first part of the meeting was with the High Speed Rail Authority. We are basically arguing that they need to help us with grade separations.

Ms. Baten Caswell: When is the meeting? You'd like us to come and provide pressure?

Chair DuBois: They're ongoing. They're doing the start of the environmental review. There's community meetings scheduled. There's going to be a working group set up. It's for the entire San Francisco to Gilroy segment. It's not Palo Alto specific.

Ms. Baten Caswell: If there are particular meetings that they're particularly going to talk about grade separations, if you could let us know in advance, because it's not just school district people that would be helpful. It would be HEARD Alliance people, Project Safety Net.
Ms. Godfrey: (crosstalk) Project Safety Net.

Chair DuBois: They don't necessarily want to talk about grade separations.

Ms. Godfrey: I'm sure they don't.

Ms. Baten Caswell: It won't be agendized.

Chair DuBois: Right now they're having public comments. If the School District wanted to provide comments about what should be evaluated in the Environmental Impact Report (EIR), like grade separation, that would be useful.

Ms. Baten Caswell: Can we get a—how do we find out when these meetings are?

Mr. Alaee: We can get it from staff, and then we can send it to you and Cathy.

Ms. Baten Caswell: I think that would be helpful.

Ms. Godfrey: Do you know if Project Safety Net is putting in a—if they're making a concerted effort to—they're probably the best entity to review it.

Ms. Baten Caswell: To be speaking for us or for our community actually.

Chair DuBois: The deadline for the Notice of Preparation is June 6th, so it's coming up pretty quick. For that, you can submit a letter.

Ms. Baten Caswell: I think there's some people that will hold more weight than others.

Ms. Godfrey: Yeah, but I think we should pursue it (crosstalk).

Ms. Baten Caswell: We want to make sure that we get that information to those people.

Chair DuBois: Obviously it's a very expensive project. They've committed a lot of money to Southern California, to dealing with grade separations. Here, it feels like, because they're using the Caltrain corridor, they're trying to do very little and claim that really it's up to Caltrain. Nobody's taking responsibility.

Ms. Godfrey: It's something we know works.

Chair DuBois: I guess that'll be it for that item.
NO ACTION TAKEN

Tom DuBois, Council Member and Committee Chair: Item Number 3, update on Citywide and District construction. Do you want to kick it off?

Khashayar Alaee, Management Analyst: Peter Pirnejad here is our Director of Development Services.

Terry Godfrey, School District Vice President: You get to sit through all of our meeting stuff. Sorry about that.

Peter Pirnejad, Development Services Director: No, no. Feel free to grab one and pass it around. There's more here than you need.

Melissa Baten Caswell, School District Board Member: Say your name again. I'm sorry.

Mr. Pirnejad: Pirnejad. As the Director of Development Services, I manage all of the permitted activity, all the—these are ministerial-type permits that are plan checked and issued and inspected. Nothing that's being planned, everything that's been approved and ready for the actual formal plans to be reviewed, permits to be issued and inspections to be had. This is physical construction that's going on around the City. This newsletter is distributed monthly, and it's available on our website, if you'd like to get them electronically, as well as a list of all the previous months are online as well.

Ms. Godfrey: I get it every month. I am one of your (inaudible).

Mr. Pirnejad: That's the best way to get a sense of where we are. I'll just highlight a few of these projects. The first, right here across the street, 240 Hamilton. This developer, first time being a developer, a large property owner in Palo Alto, but developing a commercial office building for the first time, 17,500 square feet, four-story, mixed-use. It's very typical of the type of buildings you're going to see in Palo Alto, mixed use with commercial, residential, possibly retail commercial on the first floor. Another project over at the Ronald McDonald House. If you haven't already seen it, it's 500 El Camino Real, right next to the Stanford Shopping Center. We're really excited about this three-story building, 51,000-plus square feet, to house children and their families that are undergoing treatment at the hospital.

Ms. Baten Caswell: Actually—we'll come back to that. You can go through it, but I think we may want to (crosstalk) more.
Chair DuBois: Peter, what gets listed on here? I see a single-family home.

Mr. Pirnejad: It's only large—usually large, extensive projects. Typically we don't put single-family homes on here. It's usually commercial buildings.

Chair DuBois: It's 1501 California.

Mr. Alaee: Page 509 at the bottom.

Mr. Pirnejad: This is a large single-family development, that's why. It's 68 new homes, 116,000 square feet of condo buildings.

Ms. Godfrey: Is this the Stanford Project?

Ms. Baten Caswell: This is the Stanford project.

Mr. Pirnejad: (crosstalk) project.

Mr. Alaee: It must have been—the "2" should be "1," it seems like. The one above and then the one below.

Ms. Godfrey: They're one big property (crosstalk).

Mr. Alaee: I think Tom was looking at that.

Chair DuBois: Yeah, I was.

Ms. Baten Caswell: You thought it was one single-family home. That's why...

Mr. Pirnejad: Yeah, sorry. The picture's actually...

Mr. Alaee: You're like that's a pretty big home to make this newsletter.

Mr. Pirnejad: That's on the next page. I think the...

Cathy Mak, District Chief Business Officer: (inaudible) the other is called University Terrace.

Ms. Godfrey: University Terrace, you're right. Sorry.

Mr. Pirnejad: No worries. I'm here to answer questions. This is pretty self-explanatory (crosstalk)

Ms. Godfrey: Cathy was saying this 1501 is Below Market Rate (BMR) housing. Is that right?

Ms. Baten Caswell: No.
Mr. Pirnejad: No, no, no.

Ms. Godfrey: (crosstalk)

Ms. Baten Caswell: This is faculty housing.

Ms. Godfrey: No, no. University Terrace is faculty housing. I thought a California Avenue address...

Ms. Baten Caswell: I thought all the California Avenue addresses were faculty.

Mr. Pirnejad: I believe it's age-restricted housing.

Ms. Godfrey: Age-restricted. I'm going on the map to see (crosstalk) in California (crosstalk).

Mr. Pirnejad: I have to check with Planning on the site, but (crosstalk).

Ms. Baten Caswell: This is part of Stanford, so this is not new for us. Whatever it is, it's (crosstalk) various parts of the Stanford thing.

Mr. Pirnejad: This was part of the Mayfield agreement that was part of the soccer fields.

Chair DuBois: I believe there's two. Isn't there one along El Camino that's more affordable?

Ms. Baten Caswell: Right. That is the apartments.

Ms. Godfrey: Yes. Right by the Wells Fargo there.

Ms. Baten Caswell: They can't control that to be just Stanford people. Pretty much anyone can apply for that.

Mr. Pirnejad: Obviously we have the Stanford Shopping Center undergoing a lot of renovation, 130,000 square feet in the former Bloomingdale's site at the Stanford Shopping Center. Some other (inaudible) along that site. Again, what we list in here are projects that are under construction as well as projects in plan check.

Ms. Baten Caswell: Are any of these projects the City's actually doing it for City office space and things like that?

Chair DuBois: That was the next question. Do we have any update on Public Works?
Mr. Pirnejad: I don't know if we added Capital Improvement Program (CIP) projects; I don't think we did. That would come from Public Works. What we tried to capture is private development. Just so there's not any confusion.

Ms. Baten Caswell: I think it would be really helpful for us to know what Public Works projects are being done as well.

Mr. Pirnejad: Like street work projects in the right-of-way?

Ms. Baten Caswell: Yeah, actually that would—we haven't even asked for that. That would be an additional ask. I do think the street works would be helpful from a—particularly near schools.

Mr. Pirnejad: I would think what would be helpful is anything that affects the public right-of-way, so that's commuters, pedestrians, bicyclists. This is actually one of the things, Tom, that was on our City Council Priorities. With the loss of Richard Hackmann, who was the project manager on that, that project has lost a home. What we were trying to do is develop—there's off-the-shelf products that help manage and provide public awareness around every street project. Whether it's Utilities replacing a water main, Public Works resurfacing a street, private development stubbing out a gas line, it would be recorded and be visible.

Ms. Baten Caswell: I can't tell you how helpful that would be, particularly for the principals to know if they're ripping up a street in front of their place or on the main thoroughfare where people are dropping off.

Mr. Pirnejad: Not to burst the bubble on that, but it's a project that we've identified as a high priority, but the person that we had earmarked to do it has left the City. We're trying to find a new home for it. It's one of the multiple projects that's on our wish list. It just doesn't have a Project Manager yet. It's something ...

Mr. Alaee: It becomes a little—it's a big project, because you have Utilities Department running projects ...

Mr. Pirnejad: All the time.

Mr. Alaee: ...you have Public Works running projects, and then you have private developers running projects. The coordination and getting the information loaded. To credit Peter, he's done a great job of getting the departments to all start to use one software system. Believe it or not, we still have multiple different databases and software systems and stuff.
Ms. Baten Caswell: There's no one—forget about the fancy database. There's not one place where it's recorded these are all the projects?

Mr. Pirnejad: No.

Mr. Alaee: Unfortunately not. A long time ago we were hoping to maybe have a cone or "work happening here" on our website, where you could click that button and then boom, all the projects would come up. It's a capacity issue. We have to do the work, but then report out on the work. The departments do it very well for each project. If we're going to go dig up a street, we'd notice that street very well and the impact of neighborhood.

Ms. Baten Caswell: You do—are the schools included in that information?

Mr. Alaee: Yeah, yeah. Anytime...

Ms. Baten Caswell: It seems like sometimes people are surprised.

Mr. Pirnejad: I think what happens is if Utilities or Public Works is affecting a right-of-way, they'll notice everybody within 300 feet or 500 feet of that impacted area. What they don't do is notify people that are just commuting through that section of road, because they don't know who those people are. What we're hoping to do is develop an app where the contractor actually doing the work the week before he goes out will say, "I'm about to start work on Waverley from here to here, and it's going to affect this side of the road for this long." Then, it becomes publicly visible.

Ms. Baten Caswell: You did let us know that Churchill was going to be impacted way more than a week in advance. That was important because it's a major corridor into Paly, into the District Office, and to Stanford. If there are any other projects like that that you just know about, that would probably good for us to know in advance. A week is not enough time for us to really do anything except for worry.

Mr. Pirnejad: Understood.

Chair DuBois: What are the conditions for private developers to close streets?

Mr. Pirnejad: Private developers out of the range of types of work that affects the public right-of-way are probably under the most rigorous review process. What they have to go through is they submit an application of how they're going to affect the right-of-way and for how long. They get a specific permit to disrupt the right-of-way for a specific period of time. Then, they have to have a logistics plan associated with it. If they're going to take up a lane and it's going to affect something like newsstands, bus stops, handicap ramps or
anything along those lines, they have to replace those and relocate those things so that it doesn't affect congestion or pedestrians, cyclists or (crosstalk).

Chair DuBois: Do they have to convince you that they need that space?

Mr. Pirnejad: Yeah.

Chair DuBois: You try to say, "Can you do it without that space?"

Mr. Pirnejad: Yes, yes. The Public Works Department reviews the application, tries to minimize the impact, reduce the number of lanes impacted, reduce the amount of time it's impacted. Then, it gets reviewed by Transportation in Hillary's department, Planning and Community Environment (PCE). Once the traffic operation and the actual logistics plan is approved, then they're issued the permit, and they can start closing down the lanes. That sort of thing happens well in advance. It's planned out; it's reviewed. All they ...

Chair DuBois: Do they have to pay an impact fee?

Mr. Pirnejad: They pay a fee. Yeah, they pay a fee.

Chair DuBois: For every day that it's closed?

Mr. Pirnejad: Yeah. They pay a fee per day, and they pay a fee for the permit. I'm not sure exactly what that is. On the other side, when you have the Utilities Department replace a water line or a gas line or you have Public Works repair a storm drain, whether it's an emergency and they just show up and do it or it's part of the CIP, Capital Improvement Program, that's been planned years in advance or it's just routine maintenance, those things don't go through level of review. They don't have to have an operations plan or any kind of plan associated with how long and how far we have to go to negate the impacts. That's something that we may want to consider going forward, especially at minimum reporting it so it's visible on some shared website where people can see that the street's going to be impacted. The common misunderstanding or myth is that private development is causing all the problems, but it's actually not. The majority of impacts to the street are because we're replacing lines, fixing lines, changing things that have nothing to do with private development.

Ms. Godfrey: When we know to notify people, is that the cards that come?

Mr. Pirnejad: Yeah.
Ms. Godfrey: Is there a way to have—sorry, Siri loves to just go on (inaudible) watch her. Is there a way to say we're going to notice the people who live along Charleston because they live on Charleston (inaudible) adding particular schools to the—tag them in the database as being interested in that neighborhood? I'm not exactly sure I'm saying this right, but ...

Mr. Alaee: I understand.

Ms. Godfrey: I understand that you probably have a neighborhood—you probably have a database and there's flags for where those people live. Having the schools included in many of those different neighborhoods ...

Mr. Alaee: That's a great idea.

Ms. Godfrey: ...so that if it's a really common thoroughfare, they get notified automatically.

Mr. Alaee: Correct. That's a great idea.

Ms. Godfrey: That way it just happens, because they're flagged appropriately.

Ms. Baten Caswell: What we could do is we could give you our boundary map, so that you could see what—not that there aren't some overflow people that come in from other places, but if you could see the boundary map. To Terry's point earlier with our commuter schools, there are certain things that they need to know.

Ms. Godfrey: Especially the high schools.

Ms. Baten Caswell: I don't know if it's—I'm thinking...

Ms. Baten Caswell: Ohlone. If something was going on Louis, if it wasn't within that area that you're talking about, the 300 feet or whatever it is. If something happens on Louis, that basically changes their commute in for almost everybody.

Mr. Alaee: Let me just ask a quick question. The boundary maps, these are the boundaries of the homes feeding into that school? That would be great.

Mr. Godfrey: If that was useful or just a way to look...

Mr. Alaee: I think that would be really useful.
Ms. Godfrey: ...sit down and look at the community map and say this is an important commute. Could you flag Ohlone as needing to know when that...

Mr. Alaee: Yeah. What our departments do is they'll use the Geographic Information System (GIS) Operating System to put a pinpoint on the project address and that circle or radius just (inaudible). Depending on what format the boundary map is, honestly we could take it and load it into our GIS system. As soon as they do a pin plot on that, they can then pull that into (crosstalk).

Ms. Godfrey: Some way to have it be automatic would be probably ...

Mr. Alaee: That would be great. How often do the boundary maps change though?

Ms. Baten Caswell: Hopefully we change them very few times. There's only a few things that really stresses people out more than anything else is the boundaries (crosstalk).

Mr. Alaee: I think if we do get the file and we do load it in our software system, then someone just has to remember on both sides that if the boundary maps change, let us (crosstalk).

Mr. Pirnejad: (crosstalk) electronic version of that.

Ms. Baten Caswell: That's so few times, that you would know.

Ms. Godfrey: (crosstalk) it's so infrequently, and they change so sort of—it's negligible.

Ms. Baten Caswell: The corridor part going into Ohlone, that won't be in the map system. How (inaudible) we'd need to—for the commute schools, maybe we need to identify what those major corridors are into that school. We only have a couple of schools like that.

Chair DuBois: I think you should also think about, if you did the entire boundary, you're probably going to get noticed all the time. This is just a single (inaudible) issue of what was relevant.

Ms. Godfrey: It is probably worth a conversation. If it's Louis Road, it's this school. If it's Charleston Road, it's that school. That sort of thing. Just somehow if we set it up to automatically apply them, then you don't have to think about it.
Mr. Alaee: We can get our staff the data, and then we can also tell them the intent. I'm sure they're in tune with the traffic flows as well. If not, our Transportation Division is (crosstalk).

Ms. Godfrey: I'm sure they are. (crosstalk).

Ms. Baten Caswell: Certainly your school traffic safety people know that (crosstalk).

Mr. Alaee: Exactly.

Ms. Godfrey: Plenty of people pay attention to that.

Mr. Alaee: I get the overall gist and goal.

Chair DuBois: In terms of capital improvements, I don't know of anything that's starting this year. We have Public Safety/Police Building in the Californi Avenue (Cal. Ave.) area. We want to build a garage before we start on the police building.

Ms. Baten Caswell: A garage for...

Chair DuBois: For the merchant area.

Ms. Baten Caswell: For the merchant area. Do you have any idea where that might be going?

Chair DuBois: Yeah. It's the surface lots on Sherman and Cal. Ave. One of those will be a garage, and one of those will become a police station hopefully. That's the plan. The other one is the bike bridge over 101.

Ms. Godfrey: It's back.

Chair DuBois: It's still pretty pricey.

Ms. Baten Caswell: What's the price right now?

Chair DuBois: Thirteen million plus some optional stuff. I think construction would be done in 2020. We have a pretty big capital improvement project list. Again, I can't think of anything that's going to be immediate or anything. There's a lot of planning going on.

Ms. Baten Caswell: Is there any work to sort of re-jigger the ins and outs on Embarcadero with the lights there and the mess that it is pretty much all the time? I know there's a lot of different—there's Stanford; there's Town and Country; there's Paly. There's a lot of stuff.
Ms. Godfrey: I thought there was some changes in the light timing. Do you mean...

Chair DuBois: They worked on that, Town and Country.

Ms. Baten Caswell: It's still pretty awful.

Chair DuBois: A lot of traffic.

Ms. Baten Caswell: Is there any—there's nothing in the works there, any changes?

Ms. Godfrey: You probably know we had a kid hit there a couple of weeks ago.

Chair DuBois: (crosstalk)

Mr. Alaee: We heard that. Let me check. I thought there was something coming up, but I don't know if it's done or not.

Chair DuBois: I was checking in on that. I thought they did it.

Mr. Alaee: Let me (crosstalk).

Ms. Baten Caswell: I drive it every day, so I can tell you it's still—it doesn't feel different. It might be different; it just doesn't feel that different.

Ms. Godfrey: I don't (inaudible). I try and stay away from there. I usually have to go (inaudible).

Ms. Baten Caswell: I know Stanford's involved. There's a lot of pieces to that.

Chair DuBois: We have a couple of other people. I don't know if you guys want to introduce yourselves. Are you here to talk about school construction projects?

Laura Larsen, School District Bond Program: Hi. I could do that. Do you want to do that now or do you want to...

Phil Mast, Guest: I'm Phil Mast, and I'm just here to listen.

Chair DuBois: Welcome.

Ms. Larsen: I'm Laura Larsen. I've been working with the District on their bond program almost eight years now, since basically the beginning of this last bond. (inaudible) come up here to talk about this summer's school
projects that we have going on. I'd say a big chunk of them are over at Gunn High School. We have a lot of things happening at Gunn this summer, mostly in preparation for the construction of the central building project, kind of in the middle of campus. Right now, we're going to be getting that site ready for construction to start in the fall. We have to move some interim (inaudible) for some of the programs. They're going to be losing their home right now, and put them into their interim space. We're doing that work. Moving the portable to make way for construction access at that place. Moving custodial sheds and things like that to another location because they're also in the location. Also, the painting project is going on at Gunn. That is going to be going on, and the entire campus is impacted there. At Paly...

Ms. Baten Caswell: Wait, wait. Just going back to Gunn. If you guys, Spangenberg is going to be closed. Is it one year or two years?

Ms. Larsen: We want to keep it down for one year from start of construction. We would like to open it back up after the first year and only get access—we'll still be working on the two-story portion, but we want to have Spangenberg (crosstalk).

Ms. Baten Caswell: They will be—for the one year when it's closed, they will be doing their theater stuff over at Paly.

Ms. Larsen: Yeah. We're going to keep the little theater open for programs on schools (inaudible) every day, so they'll (inaudible) the little theater. The productions and things like that will (inaudible) Paly. We hope to only keep them down for 1 year, so we can give them access back into Spangenberg while we still finish up the two-story (crosstalk).

Ms. Baten Caswell: That's important because Spangenberg gets rented out quite a bunch for community activities. I don't know if the City every rents it out, but I know that community groups do. You should just be aware of that.

Chair DuBois: Are you guys demo'ing the music buildings this summer?

Ms. Larsen: Not this summer. We'll make the interim housing for music programs, music and choir programs, get them into their new location, and then we're going to do haz mat abatement on all the buildings that are to be demo'ed, and then we'll demo the buildings at the start of construction. Haz mat will happen probably before that. That may be late summer, early fall, and then construction and demo would start in the fall sometime.

Chair DuBois: Are you going to lose parking and bike racks?
Ms. Larsen: No. We'll lose one area of bike racks, but we're working with the campus on relocating to some areas. With the central building project going where it's at, to build that we have to close a corridor where a lot of the kids would normally walk through. We're looking at strategically placing bike racks around that area and locations. We're working with the campus on that.

Chair DuBois: Are they not going to lose any parking?

Ms. Larsen: No parking is going to be changing. I think it's like four spots where people are ad hoc parking near the food service areas. They've been parking there a little bit, but we'll take down those few spots. The fence line isn't changing from what's there right now. We're going to follow that (inaudible) around.

Ms. Baten Caswell: We won't have the community that lives right next to Gunn show up to complain?

Ms. Larsen: No, I hope not. We're not really losing any parking there at all. We'll work with the campus on the bike parking and access for that. We've been meeting with the Traffic Safety Committee quite often and informing them. We're searching and really trying to place bike racks and things like that. Moving on to Paly. Now that the theater's going to be wrapping up, we'll be finishing off, getting them moved in with some of the equipment and furnishings and things like that over the summer. The gym will still be going on pretty gangbusters until—that one hopefully will be done next year (inaudible).

Ms. Baten Caswell: How many parking spaces open up once the gym is complete?

Ms. Larsen: Just a few that are around the area. There's still the few parking spots that were made right where the fence line is at, the construction area, but it wasn't really adding any parking right in front of the gym area where the blacktops used to be, where some cars have parked there before. What will happen is when we can get all the construction workers off the site, it opens up some of the parking back onto (crosstalk).

Ms. Baten Caswell: Do you know how many spots that is?

Ms. Larsen: I don't know off the top of my head. I know we worked out with the campus X amount of cars or workers on the campus and then off the campus as well.

Ms. Baten Caswell: The reason I'm asking that is because we did have community members here at the last meeting who were...
Ms. Larsen: It's a tough spot right now.

Ms. Baten Caswell: Right now obviously we can't change that, but when it's over...

Ms. Larsen: We can (crosstalk).

Ms. Baten Caswell: ...making sure, being very clear about what additional spaces we'll have. I think that might make them feel better.

Ms. Larsen: I can put an inquiry in. I can (inaudible) email (inaudible).

Ms. Mak: Do you know how many spots we have (inaudible) done?

Ms. Baten Caswell: Is it 56 or 58?

Ms. Larsen: It was like 56 spots, and then it was opening up the back area too, where the construction trailers were at, where we had the general contractor and the IOR's trailers parking. That was in a parking spot. That staff parking is reopened too. It's helped out quite a bit in that area. I think 56 in that one little area, but then an additional—I think it's 16 now staff members can park in that back area where the trailers were at. (crosstalk) some of the (inaudible).

Ms. Baten Caswell: How do we get that communication back out to the South Park community, that those spots...

Ms. Godfrey: Southgate. (crosstalk) South Park forever more.

Ms. Larsen: Right now, we're working on the parking lot area, because we had more construction on the theater there. We had to restripe to make access around. Now we're working on implementing it back into—now that we have that extra drop-off zone and parking near the theater, we're looking at the work around that area. For the quantity of spots, we're going to do a full quantity check of how many parking stalls we have (inaudible) get that information back out to (inaudible).

Ms. Baten Caswell: I think the communication to the community "we have lost this much during construction. We have gained this back." Just very clear. It's a pretty important piece of communication based on last meeting.

Ms. Mak: I'll talk to Bob (inaudible) getting that back out to you.

Ms. Larsen: We'll get that information to Bob (inaudible).

Chair DuBois: Any other elementaries or middle schools?
Ms. Larsen: Elementaries are being—all the elementaries, middle schools, but most of the majority of it is painting work with the elementary schools and then the middle schools. We also have some concrete work. Some of the areas, they were just doing some maintenance on smaller projects, so they're a little bit faster. Just summertime projects. Fairmeadow, I have (inaudible) Fairmeadow, Escondido, Hoover, Palo Verde, El Carmello, Duveneck have some concrete, asphalt, painting (inaudible).

Ms. Baten Caswell: Are you asking this because you're wondering if the fields are going to be impacted for summer programs?

Chair DuBois: I was just curious where construction was going on. Most of the major construction has been completed from the bonds but the elementaries and middle schools.

Ms. Baten Caswell: We have $60 million that we just released for elementary school programs. That's...

Ms. Larsen: That's new. We're just going to start that planning coming up. Right now we're doing the planning for Addison Elementary School with the donor-funded design portion. Tonight we have a community meeting for the neighborhood around Addison. Hope it's heavily attended. The follow-up with the last advisory meeting. (inaudible) to come back to the Board likely in August. That's for Addison. Right now the elementary schools, we're not performing any construction. Addison is the only one that's planning, and then we'll start the planning again for the other elementary schools moving forward. (inaudible). The middle schools, they're pretty much—they're done (inaudible) right now or the major work is (inaudible).

Chair DuBois: We had the—I don't know what we called the event where Max and Jim signed the compact on Cubberley to start a design, really starting to plan for what's going to happen with Cubberley. Is there any of the bond money tied to Cubberley? Is there any funding for construction?

Ms. Baten Caswell: Not at the current time. It's not as if it couldn't be, but we've just allocated to the elementary schools. I have to say that at the last meeting when Jim was going through his priorities and he said Cubberley was off the priority list, that was...

Chair DuBois: I didn't recall that.

Ms. Baten Caswell: Or it was below the line. He said something about his priorities. Maybe go back to the Minutes and take a look at that.
Chair DuBois: We have four years left of the five years. I think we’re all trying to work towards figuring out what to do with Cubberley and kick that process off.

Ms. Baten Caswell: Our direction to Max was to sit down with Jim and talk about the needs on both sides, so that we could then start a process. I am not aware that that conversation has completed.

Mr. Alaee: The City and the School District signed that covenant, right? Several months ago.

Ms. Baten Caswell: Yeah.

Mr. Alaee: I think there's a working group and folks are meeting. We can get a status update. Just real quick; I don't mean to shift the conversation away from the School District. Peter does have to leave at 9:00. I don't know if there's—if there aren't any other City questions, we can maybe let him go.

Ms. Godfrey: I don't have any other questions.

Chair DuBois: Thanks for coming.

Ms. Baten Caswell: Thank you. This is helpful.

Mr. Alaee: Thanks so much.

Chair DuBois: Laura, thank you too.

Ms. Larsen: I don't have anything on (inaudible).

Ms. Baten Caswell: I don't see it in the Minutes, so maybe he said this at a different place, but that...

Ms. Godfrey: I don't remember that.

Ms. Baten Caswell: I was surprised.

Ms. Godfrey: (crosstalk)

Ms. Baten Caswell: Maybe I didn't get it from here.

Chair DuBois: I've talked to him multiple times. Again, I think there's a working group and there's some discussion about kicking off a design process.

Mr. Alaee: Correct. I believe the Community Services is looking at potentially bringing an idea or some sort of (inaudible) that's similar to an idea that can help with the design (inaudible) process. I haven't been a part of the
conversations, but I can touch base with him and get an update on where things are from the City's end. I'll get back with Cathy.

Ms. Baten Caswell: I don't think we've had an update from Max recently on this.

Ms. Mak: The group had met at least a couple of times now. The last meeting was several months ago.

Mr. Alaee: I know on our end, we're just about to start on year-end wrap-up and budget. A lot of people are focused on that. We've lost several people in our budget office. It's a time-intensive process.

Chair DuBois: Anything else on this item?

Ms. Godfrey: I don't think so. Thank you.

Chair DuBois: Thank you.

**NO ACTION TAKEN**

4. Review Upcoming Calendar and Agendas

Melissa Baten Caswell, School District Board Member: Is a lot of the—you keep mentioning people that you've lost. Is this more than typical or is it just sort of how business goes?

Khashayar Alaee, Management Analyst: I think it's a little bit unusual. The economy's doing good, so there's other jobs out there. Also, the housing costs are just significant in the Bay Area. It's important for our employees, and then the commutes are just horrendous for folks. It's a competitive market in government. Other agencies out there are actively recruiting. I think the Baby Boomer retirement is coming upon us. I think all those are all the factors. I'm trying to make sure the TVs are on, because I want to show you guys this. We're going to talk about the schedule for next month.

Terry Godfrey, School District Vice President: These are pretty impressive TVs.

Ms. Baten Caswell: A lot of TVs.

Tom DuBois, Council Member and Committee Chair: Thank you for coming. I didn't—you're (inaudible) the public. Did you want to mention anything?

Phil Mast, Guest: No, I'm just listening pretty much. Thanks.
Ms. Godfrey: We're pretty casual, so if you have questions. A little less formal than going to a City Council or School Board meeting. You seemed to know your way around, so I thought (crosstalk).

Ms. Baten Caswell: What's the electronics in the front? What's that represent? In the front when you come in, what is the electronic screens?

Chair DuBois: That a piece of interactive art. People can put in ideas on the web and news and things, and they pop up.

Ms. Godfrey: (inaudible)

Chair DuBois: I think you can—I don't know if you send it to Twitter. There's a way you can...

Ms. Godfrey: How do you do it, Cash? I want to send stuff there.

Mr. Alaee: It's actually—there's an app you have. I want to say it's...

Ms. Godfrey: Tell me which app it is. I've many apps (crosstalk).

Mr. Alaee: You just open it up on your website. I'm sorry. It's not an app; it's...

Ms. Godfrey: It's not the Palo Alto 311. It's not Our Palo Alto. It's not the—you guys are like an app machine.

Mr. Alaee: What is it? I'll have to look it up. You can also go to that TV right there...

Ms. Godfrey: You get this stuff set up. I'm going to go check it out. We're going to do this.

Ms. Baten Caswell: I'm sorry I distracted her. It was probably not a good idea. I've just been staring at it for the whole meeting.

Mr. Alaee: I don't know why the TVs aren't coming up.

Chair DuBois: Did you have a lot to show or can we talk about it?

Mr. Alaee: For June, what we tentatively have is the middle school athletics program. I don't know what that's—if we can do that in June.

Cathy Mak, District Chief Business Officer: I know the two lawyers have been talking. After that, then staff and attorney can come talk about the needs from both sides. (inaudible).
Mr. Alaee: Our meeting's tentatively scheduled for June 16.

Ms. Baten Caswell: We have an issue with that. I thought we had brought that—isn't that when our offsite is?

Ms. Godfrey: No.

Ms. Baten Caswell: When's our offsite?

Ms. Godfrey: Our offsite is...

Ms. Baten Caswell: No, it's early in that week. Never mind.

Ms. Godfrey: Our offsite is Monday and Tuesday of that week.

Ms. Baten Caswell: We don't have an issue with that. Never mind.

Mr. Alaee: I just realized I have an issue with that, not that I need to be here. I know that Jim and I will not be here that day. Is there a way we could target another date? Is the 23rd too late for your...

Ms. Mak: What day is that?

Mr. Alaee: The 23rd is the following Thursday.

Chair DuBois: Thursday.

Ms. Baten Caswell: It's a Thursday, the following Thursday.

Ms. Godfrey: We have a Board meeting the 21st, right? We're likely to be in town. I'm not leaving town right away.

Ms. Baten Caswell: I'm not leaving town; I'll be in town. The people that need to present for this, are they going to be around?

Mr. Alaee: It would actually give us another week. If we can't do middle school athletics, the other item that's tentative is the discussion about the local tax on business. I don't know if we could potentially do that. I don't know what's going with the TVs. The other items we had remaining were an update on the Comprehensive Plan and teacher housing, safe rides and traffic around schools. That usually comes up in the fall. Sustainability programs, we usually do that annually. The Cubberley planning process, Ventura lease, strategies for increased early childhood services and childcare.

Ms. Baten Caswell: Given the new kindergarten plan, I think it would be helpful to have—what were you going to report on the childcare situation?
Mr. Alaee: I think we still needed to circle back with staff and firm up what that was. I missed the first meeting of the year, February, where we kind of created these items. I don't know who brought it up or what the intent was around that subject.

Ms. Baten Caswell: For the City arrangement with the childcare providers and our arrangement, I don't know if we need to get a report on what's changing. What do you think, Terry?

Ms. Godfrey: It seems like we should.

Ms. Baten Caswell: It seems like we should, and it seems like we should before school starts. I'm almost thinking that if we could do that and the fields thing, maybe that's too much to do.

Mr. Alaee: What would be the intent of the conversation? To talk about how the kindergarten...

Ms. Baten Caswell: If there's any gotcha's—yeah. With the kindergarten changing, is there anything that we need to talk about before the school year starts? It seems like we get surprised by things regularly.

Chair DuBois: With the kindergarten changing to the afterschool, I forget what they're called. Are you guys planning on...

Ms. Baten Caswell: The hours will change, because there are some number of kindergarteners that go to afterschool at Palo Alto Community Child Care (PACCC).

Chair DuBois: The City runs those or who runs those?

Ms. Baten Caswell: We have an arrangement, and you guys have an arrangement too. I just don't know the parameters of both arrangements.

Ms. Mak: The City contracts with PACCC. They have a new provider at Nixon, Kids Choice, starting in July.

Chair DuBois: They're going to see a change in demand potentially.

Ms. Mak: Right. We have been—PACCC is aware about the potential changing kindergarten, because we have been (crosstalk).

Chair DuBois: They have a new director too. That might be a good one.
Ms. Baten Caswell: I think there are going to be some probably surprises here, and it'll be good to get them out on the table early, so that we're not running into them as school starts.

Chair DuBois: That's very specific. When I brought this one up, I think I was also just interested in talking about childcare supply in general.

Ms. Baten Caswell: Which is probably another very important thing for us to talk about, because we've been in short supply.

Ms. Godfrey: The on/off indicator was the issue.

Ms. Baten Caswell: Maybe we could split that in half.

Chair DuBois: I don't know...

Ms. Baten Caswell: Who were you hoping would present for the childcare supply?

Chair DuBois: I don't know. Does the School District have any programs for early childhood education?

Ms. Baten Caswell: We do have a whole early childhood education program that kind of goes out of Greendell.

Ms. Godfrey: Out of Greendell, yeah.

Ms. Baten Caswell: That's...

Chair DuBois: It's not expanding or changing?

Ms. Godfrey: It's not really changing.

Ms. Baten Caswell: It's not changing, no. If anything, the only change would be if the population for TK changes, which we have not seen any reason for that to change. If anything, it's been a little bit declining.

Chair DuBois: We all see this demand, but there's no programs (inaudible) expand supply.

Ms. Baten Caswell: I thought you were going to talk about the afterschool need, which is also a big demand that's not fully ... I don't know who is the person who would give the report, because I don't know that there's a person that sort of looks at that in macro.

Ms. Mak: PACCC has done some survey and study in that a year ago.
Ms. Baten Caswell: Is PACCC the right—it seems to me that if this is a policy question, are we providing enough childcare across the City to meet demand, then there needs to be somebody that can look at it at the macro level. Maybe PACCC is the best we have, but they're a very specific provider.

Ms. Mak: We've been working with Minka with the City, and she ...

Ms. Godfrey: I was just going to say it seems like Human Services is the department in the City that does that.

Ms. Mak: (crosstalk) appropriate person to present.

Mr. Alaee: I think what maybe we can do is invite PACCC, invite Minka ...

Ms. Baten Caswell: That's what you were thinking about the policy area around this. Right?

Chair DuBois: Yeah, for both organizations.

Ms. Baten Caswell: It's way more than just early childcare. Actually there's a whole big group doing early childhood analysis across the county that a lot of people from the School District are a part of. We get a report on that too, but it's a different thing. That's just early childcare; that's not—that's early education, not childcare for older students.

Chair DuBois: I was thinking more younger. There's somebody from the County who could come?

Ms. Baten Caswell: There's a group. Who's the head of that group with Sharon Keplinger? I could find out who that is. As a matter fact, I just got an invitation to something they're doing. There's somebody that's in charge of that. We can invite them too.

Ms. Godfrey: I don't recall seeing that invitation.

Ms. Baten Caswell: I think it was just sent to me as a person.

Ms. Godfrey: It doesn't strike me.

Chair DuBois: Cash, could you scroll up? Do you have our (inaudible)?

Ms. Baten Caswell: It's not a School District initiative. It's a County initiative. I don't even know if it's sponsored by the County or it's sponsored by a nonprofit that's trying to push something forward. I think it actually might be.

Ms. Godfrey: Local tax on business and transportation?
Mr. Alaee: Local tax on business for ... Maybe what we can do is potentially maybe invite PACCC, invite Minka, have a conversation about what PACCC's previous research provided and insights, Minka's view. Maybe as Board Members and Council Members, we can start to talk about the framing of the issue, and then take it from there.

Ms. Baten Caswell: I'd like somebody from the District who's going to be running the kindergarten program and the logistics around it to talk about that as well. Probably someone in Barbara's group, I guess. I don't know.

Ms. Mak: Either Barbara or Holly. Also, I'll invite Dawn because she's working very closely (inaudible) TK.

Chair DuBois: It sounds like it should be split up into two items. There's the change in kindergarten and afterschool care, and then I'd like to, if we can, get the right people, early education and childcare facilities.

Mr. Alaee: We would frame it as ...

Ms. Baten Caswell: Capacity, early education and childcare capacity versus need, something like that.

Mr. Alaee: It'd be discussion about—I'm sorry, one more time. Early childhood ...

Ms. Baten Caswell: Early education and childcare capacity and needs.

Chair DuBois: That could be Palo Alto Child Care and potentially somebody from the County that you were talking about.

Ms. Baten Caswell: I don't know that the County government—there may be some nonprofit. I don't know that that conversation has to happen in June. I think the kindergarten one does, though.

Mr. Alaee: Basically what's that discussion about?

Chair DuBois: We could do them together.

Ms. Baten Caswell: It would be great if we ...

Mr. Alaee: What's the title or what would be the ...

Ms. Baten Caswell: Discussion of—impacts of new kindergarten program.

Chair DuBois: All-day kindergarten.
Mr. Alaee: Schedule?

Ms. Baten Caswell: Yeah, schedule. This is not just on childcare. It's also is the traffic impacts. I think we do need to have this conversation before—just think of every August we get a call from someone in the City who is upset that we didn't have this conversation before we changed the hours and traffic patterns.

Ms. Godfrey: How about the Epi-Aid? Is that ...

Ms. Baten Caswell: We won't have that until late in June, I heard yesterday. We should do that in August.

Mr. Alaee: This one? Is it Center for Disease Control (CDC) Epi-Aid?

Ms. Baten Caswell: Yeah. That won't be ready until the end of June.

Mr. Alaee: We can talk in June about that.

Ms. Baten Caswell: Actually it won't be the final report.

Ms. Godfrey: It's just the draft, right?

Ms. Baten Caswell: It's just the draft. I actually think—I don't know, depending on when we see the report, whether it's enough to talk about or not.

Chair DuBois: Again, if middle schools is ready, I'd like to keep it in June. We have to balance it (crosstalk).

Ms. Baten Caswell: The middle school athletics, yeah. I think so.

Mr. Alaee: Are those three items really heavy?

Ms. Baten Caswell: I think it might be. I'm thinking the middle one is the one that could be...

Mr. Alaee: Moved down.

Ms. Baten Caswell: ...moved own.

Chair DuBois: Or shorter. I think we could be efficient.

Ms. Baten Caswell: I think we could end up having a very long discussion about the middle one.
Mr. Alaee: Why don't we leave these three, and then let's see what happens with middle school athletics. If middle schools athletics can make it, we'll move Number 2 out or maybe to the third item, and then if we get to it, we get to it. If we don't, we don't. My only concern would be inviting a lot of staff for the item. Let's play it by ear and let us see what we—let's talk to staff. These sound good. Does the 23rd sound okay to change it to?

Ms. Godfrey: Let me check (inaudible).

Chair DuBois: That works for me.

Ms. Godfrey: I signed up for that.

Ms. Baten Caswell: I think the most important thing is if we're going to be able to get the presenters at that time.

Ms. Godfrey: The NBA draft's that day. I don't know if I can...

Chair DuBois: I'm glad you have that in your calendar. Do we want to just sketch in August?

Mr. Alaee: Sure. What would you guys like to do in August?

Ms. Baten Caswell: What did I just say that we need? Let's see if we can do the Epi-Aid.

Chair DuBois: If we're going to do the Epi-Aid, then that's probably a good time to just do Project Safety Net and teen programs.

Ms. Baten Caswell: I think that would be good.

Ms. Godfrey: (crosstalk).

Ms. Baten Caswell: Actually the guy who's in charge of Bryant Street Garage gave a presentation yesterday at the Project Safety Net meeting.

Chair DuBois: Do you guys both go to that?

Ms. Baten Caswell: I don't always go. Somebody invited me because of what was on the (crosstalk).

Ms. Godfrey: I always go, and I didn't go yesterday.

Chair DuBois: I know Cory goes. I'm probably...

Ms. Baten Caswell: Cory was there yesterday.
Chair DuBois: I'm probably the only one that's not up on Project Safety Net.

Ms. Baten Caswell: I think that the Bryant Street Garage is a teen program that's pretty interesting. It seems like only very few people know about it.

Chair DuBois: We talked about it last year in this group.

Ms. Baten Caswell: We did and somehow didn't get the word out very well.

Mr. Alaee: Usually I know that there's some talk about having a safe rides decision. We talked about bringing that safe ride presentation. Usually in August, September, we do the annual discussion about safe rides. Maybe what we can do is do that, the safe rides, traffic. You guys want to try to do that in August or September?

Ms. Baten Caswell: I've asked before in prior years to do it in August, and they've never been ready. It's better to get it earlier in case there's anything we have to address.

Mr. Alaee: We'll aim for August. We might want to tentatively put the discussion about the tax in August as well. I know that we're going to be doing another round of polling. I believe that...

Chair DuBois: I'm not sure. We can put it there. I'm not sure how—I don't know how you guys feel about it. I'm not sure that's a big topic for us necessarily. If we have other things...

Ms. Baten Caswell: I feel like you gave us a report on what you were proposing and your plan. Now, it's really are you going to do it or not.

Mr. Alaee: We can delete it?

Ms. Godfrey: I think so. From my perspective, you can.

Chair DuBois: Just leave it on deck.

Ms. Baten Caswell: Could you give it in the Board meeting?

Chair DuBois: I think teacher housing would be a good one to talk about.

Ms. Baten Caswell: We don't have—maybe we need to frame it. We don't have a plan right now on what we're doing about it. We just know it's a problem, and we could talk about why it's a problem and how it's impacting us. You guys could talk about how the cost of housing is impacting the City. Honestly, if we're going to solve this, it's going to need to be a regional solve. Regional could be the City region.
Chair DuBois: We could talk about potential solutions. It might be a good kind of working group to start it here before it goes to our bodies. There's some private companies that are looking at funding incentives to let groups of employees purchase housing.

Ms. Baten Caswell: There is one right now that's been a place actually for a while for teachers, but it doesn't appear that it's good enough to make the difference.

Chair DuBois: I've had some people in the community approach me about private citizens aligning with teachers to buy houses where there would be shared ownership.

Ms. Baten Caswell: That seems like the special loans that I can't remember what the organization is.

Chair DuBois: There's a lot of creative ideas out there. I think it'd be worth a discussion.

Ms. Baten Caswell: I think that would be great, as long as you're not looking to us for what's our plan for teacher housing, because we're not at that place.

Chair DuBois: I'm actually looking for this group to maybe be a little bit ahead of the plan, not just sharing the information. There's something...

Ms. Baten Caswell: I think in that topic maybe talking about what the impact has been on us and the impact on you as well would be important.

Chair DuBois: We're hearing retention of employees is critical.

Ms. Baten Caswell: Maybe just augment that topic to be...

Mr. Alaee: Maybe public service housing or something?

Ms. Baten Caswell: Teacher and public service potential...

Ms. Godfrey: Public employee.

Chair DuBois: On the Safe Routes, I don't think we ever—would we also do kind of a bike plan update as part of that?

Mr. Alaee: (inaudible)

Chair DuBois: We've been talking about traffic a lot.

Ms. Baten Caswell: Traffic's been an issue for us in this area.
Mr. Alaee: I'll just put traffic. It works better.

Chair DuBois: That seems like a...

Ms. Baten Caswell: (inaudible) have strategies for increased early childhood services, childcare. It seems like that's...

Mr. Alaee: Part of the top?

Ms. Baten Caswell: Yeah.

Ms. Alaee: Take this out?

Ms. Baten Caswell: I think you can take that out.

Mr. Alaee: What was school age programs? What was the...

Ms. Baten Caswell: I think it's part of planning this agenda out.

Mr. Alaee: (inaudible)

Chair DuBois: I think it's the middle school athletics.

Mr. Alaee: I'll take that out.

Chair DuBois: We usually have Community Services come and talk about all the programs (inaudible).

Ms. Baten Caswell: That's more than just athletics.

Chair DuBois: Yes, that is.

Ms. Baten Caswell: That includes everything. Maybe you can put that back in.

Mr. Alaee: Do you want me to just re-title it like Community Services update?

Chair DuBois: Yeah.

Ms. Baten Caswell: There's usually some sort of discussion around the library program that I maybe ... Library Services.

Chair DuBois: Do you guys want to do that? Do you feel a need for it? That's generally an update.

Ms. Baten Caswell: I don't know. Are you making any changes to anything?
Chair DuBois: I don't think so.

Ms. Baten Caswell: What I've found with this is that—although, you'd think they'd be talking all the time, it forces the school library groups to talk to the City library groups about the services for Kindergarten (K) through 12. Maybe it's a quick update.

Chair DuBois: Good. I think we've got enough for next time.

Mr. Alae: Will, you and I will sync about June. Did we say the 23rd works?

Ms. Godfrey: The 23rd works for me.

Ms. Baten Caswell: That works for me as well. Cathy was going to check in with the...

Mr. Alae: Staff.

Ms. Baten Caswell: ...staff.

Mr. Alae: When does everybody go on break? Staff doesn't get a break.

Ms. Mak: We probably will stay until the end of the month.

Ms. Godfrey: We have a Board meeting that week, on the 21st. They're likely to be around unless they're all flying the coop the next morning.

Ms. Baten Caswell: Usually once a year we share our enrollment forecasts. When do we usually do that?

Ms. Mak: The forecast ...

Ms. Godfrey: I don't think we—did we do it last year?

Ms. Mak: Yeah. We might have done it—yeah, we did it ...

Mr. Alae: We did it in the fall.

Ms. Mak: ...after we received the report from the DI.

Ms. Baten Caswell: After the 11th day. With the DI, okay. Maybe at the end of the year we do it.

Ms. Mak: Like December.

Ms. Alae: I'll add it to the bottom of the list.
Ms. Mak: The 11th day enrollment, that can be a very quick report, because it's just reporting our numbers. It shouldn't be more than (inaudible).

Chair DuBois: If we time it right, we could do probably the Comp Plan Update, the enrollment update.

Ms. Baten Caswell: On the school impacts, maybe she...

Mr. Alaee: I'll just kind of highlight these to be together.

Ms. Baten Caswell: I think you might—no, I wouldn't put them together. We could do the enrollment report—we're going to have to wait until we have the DI report. We could just give an—she could give a very quick update, what does it look like in terms of this. It doesn't give us the future look. The future look is more of a...

Chair DuBois: I was saying why not wait and do the future look with the housing future look in the City.

Ms. Baten Caswell: That's fine. Maybe we just touch on it in a Board update. I think you'll want to know. If we have declining enrollment, I think that's something you want to know.

Mr. Alaee: We can flesh out the remainder of the meetings in the future.

Ms. Godfrey: That sounds pretty good.

Ms. Baten Caswell: Thank you.

Mr. Alaee: Thank you all.

Chair DuBois: Meeting adjourned.

**NO ACTION TAKEN**

**Adjournment:** The meeting was adjourned at 9:15 A.M.
PACCC Report to City/School Liaison Committee
June 23, 2016

RE: PACCC After School Care Programs and Impact of Full Day Kindergarten

About PACCC

Since 1974, PACCC has pursued its nonprofit mission of providing care and education for Palo Alto’s children. The agency was originally founded by city leaders to meet the need for high quality and affordable options rooted in the community.

PACCC's roots in the community have grown even deeper over the years. We have more sites throughout the City of Palo Alto than any other agency. Our school-age centers are located onsite at 11 of 12 elementary schools of Palo Alto Unified School District, and we value our close partnerships with school administrators. PACCC is also a main source of training opportunities for other child care providers in our community.

PACCC currently serves the child care needs of more than 900 families daily; providing care for children from as young as two months through 5th grade at 19 sites throughout the city. The nonprofit mission of the agency includes making quality care accessible to all of Palo Alto's residents regardless of income. Approximately 17% of PACCC families receive financial aid or scholarship support either from the City of Palo Alto, the State, or from PACCC itself.

PACCC continues to maintain strong wait lists at all programs. Specifically, there is a continued need for additional space at Escondido and Juana Briones where there is one portable and subsequently lower enrollment capacity.

Impact of Full Day Kindergarten on PACCC After School Programs

- Projected loss of $240,000+ revenue in 2016-17
- Necessary reduction in staff hours for assistant directors and teachers
  - assistant director hours reduced from 40 to 30 hours per week
  - teacher positions that supported kinder enrollment have been reduced from 30 hours per week to 22 hours per week
  - it is projected that these reductions in hours will negatively impact recruitment efforts – most employees seek full time work
  - if recruitment efforts are impacted, PACCC might have difficulty enrolling to capacity
  - PAUSD has been very proactive and helpful in working with PACCC to offer opportunities for affected PACCC staff to apply for PAUSD aide and campus supervisor positions to supplement their work hours
- Lack of consistency for school dismissal times of kinders requires PACCC to staff different hours each day depending on the dismissal time
  - particularly impactful at Ohlone and Hoover where kinders are dismissed closer to noon once or twice a week
  - it is very challenging to hire staff to work different hours each day
- Adds continued strain on PACCC’s ability to support the state funded program for providing child care to low income families. PACCC is already at a critical crossroads as the funding gap has grown steadily over the years. State funding supports less than half the true cost for care, leaving PACCC to fund a gap of close to 500k per year. This puts a strain on parent fees and staff salaries. Any loss of revenue further strains PACCC’s ability to support the state funded program.
